High Support Inpatient Rehabilitation (Level 2) Service for Men

Good

Now taking referrals

Cygnnet Fountains is a high support inpatient rehabilitation (level 2) service for men who have severe and enduring mental illness and who may have been detained under the Mental Health Act. The men we support come to us following multiple placement breakdowns, failed treatment programmes or stepping down from secure settings.

At Cygnnet Fountains we have a number of different options to help the people we support to move on. We have 3 self-contained flats within the service to enable growth of skills prior to discharge, whilst still having the full support of the multi-disciplinary team (MDT).

Our psychology and occupational therapy led interventions effectively tackle the challenges of mental health and, alongside our clinical interventions, we help the men we support to positively progress.
