

Improving lives together

Dual Model Rehabilitation Service (Level 1 & 2) for Men

**Blythe Ward,
Cygnet Joyce Parker Hospital,
Coventry**

Blythe Ward is a 12 bed specialist rehabilitation service for men. Our flexible service includes High Support Inpatient Rehabilitation (Level 2) and Community Rehabilitation (Level 1). This dual-level rehabilitation model ensures that individuals receive the support they need while developing independence at their own pace.

Our dedicated clinical teams provide a full multi-disciplinary programme that includes; occupational therapy, psychology, psychiatry and vocational training, offering service users the opportunities and support they need to stabilise their condition and enter society with a renewed sense of enthusiasm and optimism.

Cygnet Joyce Parker Hospital is located just outside of Coventry City Centre, there are good transport links with a bus stop just a couple of minutes' walk from the service. Within the centre there are plenty of shops, restaurants, museums and theatres.

Increasing complexity at every stage of rehabilitation means we need to provide the right level of care at the right time.

Our approach enables the men we support to gradually build skills in self-catering, self-medication, and community reintegration, before moving on to fully independent living. We work with individuals to develop personalised recovery plans that align with their long-term goals.

Level 2

For those needing a high level of support

Level 1

For those ready to engage in greater independence

Our expert team work collaboratively to empower the men in our care to transition into the community with confidence
